

SUMMARY

A fast-learning Computer Science graduate and Certified Apple Technician who is adaptable, dependable, and methodical. Demonstrated ability to resolve complex technical issues, manage international teams, and implement critical cybersecurity initiatives. A forward-thinking professional committed to achieving excellence, delivering high-quality data driven solutions through an innovative and logical approach.

SKILLS

- **Development:** Python • Java • JavaScript • HTML/CSS • Agentic AI Development • Website Design
- **Platforms & Tools:** Windows • Linux • macOS • iOS • Git • Microsoft Office Suite • Adobe Creative Suite • AGI (Claude/Gemini/GPT)
- **Hardware & Repair:** PC Repair • OS Repair • Software Repair • Apple Product Repair • Network Support
- **Technical Expertise:** OS Configuration • Software Testing • Team Leadership • Project Management • Data and Technical Analysis
- **Specialized:** Apple Certified Technician • PC Building • Drone Videography • Photogrammetry • 3D Modeling • CAD

WORK EXPERIENCE

Advanced Repair Agent

Geek Squad • June 2025 - Present

- Perform expert-level troubleshooting and diagnostic repairs on desktops, laptops, phones across Windows, macOS, iOS, and Android platforms.
- Execute advanced data recovery and secure data transfer protocols to ensure the integrity of critical client information.
- Serve as a Certified Apple Technician, conducting precision hardware repairs on iPhones and iPads while maintaining strict Apple GSX standards.
- Communicate technical diagnostics and repair timelines effectively to clients, ensuring high satisfaction and trust.

Independent Website Designer

Freelance • January 2026 - Present

- Developed a professional user-friendly portfolio site (greatbrandino.com), using the platform to document custom software, including automation tools. The website features a personal drone videography showcase as well.
- Established a professional digital identity that boasts advanced computer science concepts with practical, business-oriented IT solutions.

IT Automation Consultant

Freelance • June 2024 - May 2025

- Designed and implemented a custom Python/VBScript automation tool to digitize a manual bookkeeping process for a local business.
- Eliminated manual data entry by developing a script that parses PDF receipts and populates Excel spreadsheets via API/COM automation, without interrupting workflow. Demonstrated to employees the steps for saving receipts to a specific folder.
- Drastically reduced administrative overhead and increased data accuracy for financial reporting.

Project Coordinator

Turnberry/Orbia • November 2021 - October 2022

- Instituted a rigorous cybersecurity update initiative that incorporated two-step verification and essential hardware upgrades, leading to a measurable decrease in vulnerability scores across 10 key systems, optimizing security posture.
- Initiated weekly vulnerability management meetings focused on progress reports that involved over 20 employees, reviewing simulated real-world attacks to strengthen incident response capabilities, as well as tasks related to remediating the findings.
- Chaired weekly meetings and delivered project status reports to senior colleagues in an effective manner.
- Implemented an advanced reporting solution that captured essential cybersecurity metrics and project milestones; utilized by over 15 team members, streamlined processes, and generated cross-departmental collaboration.
- Coordinated complex scheduling across a diverse international team; facilitated 15+ cross-time zone meetings each month, increasing project completion rates.

Business Analyst Intern

Johnson Brothers • May 2021 - August 2021

- Modernized operations by conducting end-to-end testing for a new website and routing tools, ensuring a user-friendly experience.
- Validated the complete integration of Omnitrac with legacy systems, establishing data synchronization for inventory and routing.
- Played a key role in the Wave 3 Omnitrac implementation, testing data transfers, and developing upgrade plans.
- Facilitated new website design (JBHub 2.0), providing feedback to enhance sales rep experiences.
- Advocated for ERP modernization to streamline processes, increase efficiency, and improve environmental sustainability.
- Designed impactful dashboards and reports in Power BI to communicate complex cybersecurity risk data.

EDUCATION

Bachelor of Science in Computer Science

University of St. Thomas • 2016–2020

CERTIFICATIONS

Certified Apple Technician

Tech ID: T242A46274

Certified to repair iPhones, iPads, MacOS, Macbooks

VOLUNTEERING

Geek Squad Academy

June - July, 2026
